SKILLS

- **Languages:** C, C++, Python, Java, C#, JavaScript, Go, TypeScript, SQL
- **Cloud & DevOps:** AWS, GCP, Azure, OCI, Docker, GitHub Actions
- **Frameworks:** Django, Bun.js, Express.js, Adonis.js, Hono.js, Nest.js, React, React Native, Next.js, Tanstack

WORK EXPERIENCE

Popin: *Backend Engineer*

Apr 22, 2026 – Present

- Owned the backend architecture and engineering for Popin, converting the founder's idea into documented product requirements such as SRS, technical architecture and implementation plan
- Evaluated and selected backend technologies (Golang), cloud infrastructure and deployment plan, design backend system in modular fashion to ease scaling from single-server deployment to microservice level architecture
- Architected and implemented APIs across consumer application, host workflows & administrative surfaces, supporting various cross-entity, cross-actor workflows
- Implemented and integrated third-party services for supporting application core services such as mapping/location service, price formulation, payment processing and other external APIs
- Collaborated directly with product founder and frontend engineer to establish proper product requirements, API contracts and smooth integration of backend services

Walls & Gates: *Software Engineer*

Apr 22, 2025 – Sep 19, 2025

- Redesigned and rebuilt the company landing page, improving performance, responsiveness, and maintainability
- Developed client landing pages for Global Diagnostics Lab and New Mountain Farm using modern frontend frameworks
- Acted as primary backend engineer for ZeroCancer, supporting system planning, API development, and feature implementation
- Implemented frontend state management and asynchronous data fetching in ZeroCancer, ensuring reliable frontend-backend synchronization
- Diagnosed and resolved production issues, including DNS misconfigurations, SSL certificate errors, and database migrations
- Led software procurement and deployment, evaluating and implementing open-source solutions (BillionMail, Frappe LMS, Frappe CRM) to help support company internal operations using Cloud technologies
- Built dynamic forms and order-processing backend workflows for the TheContentFactory platform, a conglomerate of Walls & Gates

Toraaah: *Front-end Web Developer*

Jul 29, 2024 – Dec 18, 2024

- Developed a browser-based video editor, enabling seamless in-browser video editing and enhancing user engagement
- Implemented an interactive note-taking feature, allowing users to annotate and save insights directly alongside video content.

PROJECTS

GHM Unit Platform: *Software Engineer*

Sept 29, 2025 – July 31, 2026

- Led development of comprehensive church media unit management platform for GHM, overseeing implementation across attendance, examination, unit management and financial management systems.
- Served as primary technical liaison between GHM stakeholders (excocs & team leaders) and development team, translating requirements into features, and delivering features timely

Interswitch Hackathon: *Software Engineer*

Jan 29, 2025 – Jan 31, 2025

- Secured 2nd place in the Interswitch Pitching Contest, competing against 15 teams with a tech-driven real estate solution powered by automation and data insights
- Engineered a full-stack application using Next.js for the frontend and backend, ensuring seamless user experience and performance

Alpinist Hackathon: *Software Engineer*

Apr 1, 2024 – Apr 20, 2024

- Led a team to achieve 3rd place in a school hackathon by integrating AI-driven scheduling algorithms into a timetable management system
- Developed the frontend using React (Vite) and the backend using Express.js, ensuring an efficient and scalable system

CERTIFICATIONS**IBM Full Stack Software Developer**[issued Jan 2025](#)**Google Cloud Certified Professional Cloud Architect**[issued Dec 2024](#)**Oracle Cloud Foundations Associate**[issued Sept 2023](#)**EDUCATION****Landmark University** || Omu-Aran, Kwara State, Nigeria

Oct 2022 – Jul 2026

B.S. Computer Science (First Class Degree)
